VINAY J

SAP CAP (Java) Developer — SAP BTP · CDS · OData · Spring Boot

Bangalore, India · jujarayvinay1210@gmail.com · +91 87924 37224 · linkedin.com/in/vinay-j-a44375179 · github.com/vinay72368

Summary

SAP CAP (Java) Developer with **3+ years** building cloud-native apps on **SAP BTP** using **CAP** with the **CAP Java SDK**, **Java**, and **Spring Boot**. Delivered **100+ REST APIs and OData services** across **10 modules** on **SAP HANA Cloud**, with strong **CDS** modeling, secure services (**OAuth2** / **JWT** / **XSUAA** / **SAP Identity Services**), **Cloud Foundry** deployment, and **S/4HANA** integration via **Destination** and **Connectivity** services.

Technical Skills

SAP BTP & CAP: SAP BTP, CAP, CAP Java SDK, CDS, OData services, CDS artifacts / database modeling, SAP S/4HANA integration

BTP Services: SAP HANA Cloud, XSUAA, Destination Service, Connectivity Service, Job Scheduler, Event Mesh, SAP Identity Services

Security & Deploy: OAuth2, JWT, XSUAA, Spring Security, Cloud Foundry, Docker

Languages & Frameworks: Java (8/11/21), SQL, JavaScript (ES6+), Spring Boot, Microservices, Spring Data JPA / Hibernate, RESTful APIs, Apache Kafka

Data / CI-CD / Testing: SAP HANA Cloud, HANA SQL, PostgreSQL · Git, Jenkins, GitLab CI, Maven, JFrog · JUnit, Mockito, SonarQube, Postman

Methodologies: Agile (Scrum), Low-Level Design, Architecture & Design Reviews, Production Support

Professional Experience

AsInt, Inc. — SAP CAP (Java) / Backend Developer **March 2023 – Present**

Bangalore, India · (3+ years) — Technical point of contact for an Asset Integrity Management platform (Oil & Gas) on SAP BTP.

- Built and maintained cloud-native apps with **SAP CAP (Java)** and the **CAP Java SDK** on **SAP BTP**; designed **100+ REST APIs and OData services**, modeling **50+ CDS entities** across **10 modules**.
- Developed business logic in **Java** / **Spring Boot**; created **CDS artifacts** and database models on **SAP HANA Cloud** and integrated **SAP S/4HANA** for data exchange.
- Tuned **SAP HANA Cloud** models and **HANA SQL** queries, **cutting response time by ∼50%**.
- Configured auth with **OAuth2**, **JWT**, **XSUAA**, **SAP Identity Services**; integrated third-party/on-premise systems via **Destination** and **Connectivity** services.
- Implemented scheduled processing (**Job Scheduler**) and event-driven messaging (**Event Mesh**, **Kafka**, **hundreds of events/day**); deployed and managed apps on **Cloud Foundry**.
- Built a modular **calculation framework** (TMIN, MAWP, corrosion rate, FFS, RBI) using **CompletableFuture** / **ExecutorService** with transactional boundaries and idempotent validation for concurrency-safe consistency.
- Ran **CI/CD** (**Maven**, **JFrog**, **Jenkins** / **GitLab CI**) with **unit testing** and **code reviews**; contributed to **design reviews** and mentored **10+ junior engineers**.

Key Projects

Asset Integrity Management System *(Oil & Gas)* — CAP (Java) · CDS · OData · SAP HANA Cloud · SAP BTP · Cloud Foundry · XSUAA · Event Mesh · Kafka

- EAM/APM platform: **100+ CAP OData/REST services** bridging **S/4HANA** and **HANA Cloud**, secured with **XSUAA**; scalable workflows via **Event Mesh**, **Kafka**, and **CompletableFuture**.

Asset Maintenance Recommendation System — Java · Spring Boot · CAP · PostgreSQL · JPA/Hibernate · Kafka

- Extensible rule-based recommendation engine with modular services and async processing decoupling computation from request–response flows.

Maintenance Spend Planning System — Java · Spring Boot · SAP CAP · PostgreSQL · JPA/Hibernate

- Budget-planning workflows with data persistence, validation rules, and calculation components for aggregation, adjustments, and approval-stage validations.

Education

B.Tech, Computer Science — Dayananda Sagar University, Bangalore — Aug 2018 – June 2022

Intermediate (PU) — Dayananda Sagar PU College, Bangalore — July 2016 – May 2018

Additional

Languages: English, Kannada, Telugu, Hindi, Marathi

Interests: Cricket, Sketching, Gaming, Movies
